

NEW!

Jet Stream AC VENT SYSTEM

The Dampered or Filtered or Wide-Open AC Vent System for RV's!

It's your choice!! Turn it on, turn it off, and turn it around!

- Removable, rearrangeable, and replaceable. The Jet Stream is the first complete RV AC vent system that does it all...in any combination!
- The biggest, boldest AC vents ever! Allows more air flow than any other RV AC vents in history! They open, close, rotate, and filter at your option for fantastic AC control.

- Sleek, contemporary design utilizes a "screwless" automotive look. No mounting screws are visible.
- Change it and rearrange it without any tools! Change or clean filters, exchange dampered and open vents, or replace vents...all without removing the base from the ceiling!
- Available in white and medium white with 7/8", 1 1/2", and 2 3/8" extension collars (shown below). Custom colors and collar lengths by special order. Requires a 5 13/16" mounting hole.

Up to 20
Square Inches
of Free Air Space

8850 Dampered

8950 Wide Open

8950F Filtered

The 8850 is the big brother of our popular 8840 vent. It opens, closes, and rotates for complete control of your airflow. Excellent for use in bathrooms and bedrooms where dampered control is essential. 20 sq. in. free air space.

The wide-open 8950 is the most open and free flowing RV AC vent ever! Up to 18 sq. in. free air space means you need less of them. Rotation and two-way directionality directs the flow. Ultimate economy paired with extraordinary beauty make this vent truly outstanding!

The 8950F filter vent provides filtered air to the AC system. Perfect for use in increasingly popular ducted return air systems. Filter can be easily removed and replaced for cleaning.

CHECK OUT ALL OUR OTHER AC VENT PRODUCTS!

The "AIREPORT" #5840

The original and still the most distinctive RV AC ceiling vent! The Aireport's unique 360 air dispersion eliminates the "drafty" performance of louvered vents, greatly increasing the comfort level of the RV. Air volume is adjustable by simply turning the vent.

Available in white (5840WH) and bright white (5840 BTW) as shown, the Aireport can be custom fitted with extension collars of any length to accommodate RV's with roof rafters. 4 1/2" diameter mounting hole. 13 sq. in. free air space.

The "LOUVERED AIREPORT" #6840

This 2-way Louvered version of the popular "Aireport" AC vent allows the choice of directing the air exactly where you wish. Interchangeable with the 5840 Aireport, the Louvered Aireport comes in white (6840 WH), medium white (6840 ELWH), and bright white (6840 BTW) to match any RV ceiling. Custom length fitted extension collars are available. 4 1/2" diameter mounting hole. 9.5 sq. in. free air space.

The "SPACEPORT" #8840

Designed as the next generation of the popular "Aireport" vents, the "Spaceport" opens, closes, and rotates for the ultimate in comfort control.

Perfect in new RV's, the "Spaceport" may be installed as an upgrade for your existing "Aireport" with just a slight enlargement of the ceiling hole required. 4 7/8" diameter mounting hole. 10 sq. in. free air space.

Stocked in three shades of white. White (8840WH), a slightly brighter medium-white (8840ELWH), or a slightly darker off-white (8840OW). Extension collars available in 5/8", 1 1/8", 1 5/8", and 2". #8841 "shimmed" model is available for use with a trim ring on hard surface ceilings.

The "SPACEPORT TRIM RING" #8840TR

Attractive trim ring for the popular 8840 AC Vent! Simply snaps over the installed vent to hide the screw heads and create a finished "automotive" look. May require use of the #8841 shimmed vent when installed in RV's with hard surface ceilings. Available in white (8840TR-WH), medium white (8840TR-ELWH) and off-white (8840TR-OW) to match the 8840 vents.

The "BIGPORT" #9850

Simple and economical, the 9850 AC Vent is designed around a 5" opening and more open louvers. The 9850 allows 25% more airflow than our Aireport products and has a clean, flush profile. The center grill unit is removable to allow the use of an optional foam filter. Available in white with four molded in collar extensions; 1/4", 1", 1 1/4", and 2". 5 1/4" mounting hole. 14 sq. in. free air space.
