

EXPANDABLE SUPER-SLIDER

Sewer Hose Carrier and Storage Tube

Versatile | Functional | Affordable | Only from D&W Inc.

Announcing D&W Inc.'s new versatile Super-Slider expandable telescoping sewer hose carrier for RV's! The Super-Slider can be mounted undercarriage or almost anywhere for the ultimate in accessibility.

The Super-Slider telescopes from 33" to 60" providing a new level of versatility! Mounting is a breeze when the tube length is easily adjustable to adapt to the best mounting position. Expandability also saves on shipping and packaging costs.

The Super-Slider features D&W's unique hatch-type doors on both ends for super-easy access. Unlike screw-in plugs, which often bind and stick, our built-in mounting bracket door assembly features road worthy hatch-type doors with positive latches that operate easily in tough, dirty undercarriage environments. **33" to 60"**

The Super-Slider's roomy 4 5/8" inside diameter allows for storage of sewer hoses with fittings attached. **Accepts the "RhinoFlex" 15 foot sewer hose with all its fittings in a 55" to 60" length.**

D&W Inc.'s sturdy new Super-Slider is made of tough heavy-duty black polymer that will blend perfectly with your RV and last for years.

Accepts the biggest hose fittings.
Hose and fittings not included.
